- The ability to understand and evaluate disparate data sets
- Perform ad-hoc analyses and assist in data collection and data aggregation
- Proficiency with SQL and Power BI based query languages and relational data concepts
- Extract, load, and reconcile large amounts of data across multiple system platforms and sources to validate user-centric scenarios

## PROJECTS

**Pizza Sales Dashboard** Feb 2024

- I successfully developed a dynamic Pizza Sales Dashboard using Power BI, integrating SQL for data extraction and transformation.
- Designed with user experience in mind, the dashboard showcases key performance indicators, incorporates interactive features, and utilizes optimized SQL queries for efficient data retrieval.
- The project highlights my skills in ETL processes, data visualization, and problem-solving, contributing to a comprehensive understanding of business insights.

### ELECTRIC VEHICLES ANALYSIS

march 2024

- collected the data through kaggle, and performed an analysis to get some meaningful insights into growth patterns and adoption trends.
- There are different elements and k.p.i charts used in the dashboard, it is dynamically operated by using different slicers, different filters and utilizing some dax formula.

### DIWALI\_SALES\_ANALYSIS
